COMPUTER ENGINEERING

As a computer engineer, I thrive on solving complex problems and creating innovative solutions that push the boundaries of technology. I'm proficient in programming languages like C, C++, Java, and DotNet. My expertise extends to web development where I specialize in HTML, CSS, and JavaScript, and also have expertise in application development where I specialize in Android to create dynamic mobile application. I also have experience working with the flutter framework for building robust backend solutions.

KEY COMPETENCIES

Flexibility	Adaptability	Quick Learner
Time Management	Leadership	Self-motivated
Team Work	Problem Solving	Focus

EXPERIENCE / PROJECTS

Simple Weather Application   **Jun 2024 - Jul 2024**

The simple weather application developed using Flutter provides real-time weather updates with an intuitive and user-friendly interface. It features a sleek design that displays current temperature, weather conditions, humidity and wind speed. The app also includes a location search function, allowing users to check the weather in different cities effortlessly.

Agri Mart Application   **Dec 2023 - Apr 2024**

The Agri Mart application, developed using Flutter, provides a seamless platform for users to buy vegetables products directly from their mobile devices. It boasts an intuitive user interface that ensures effortless navigation, making it accessible even to those with minimal technical expertise.

Multipurpose Converter   **May 2021 - Apr 2022**

This multipurpose converter, developed using Python, is designed to handle a wide variety of data transformations, making it a versatile tool for both developers and casual users. It seamlessly converts units, currencies, and file formats, providing a user-friendly interface that simplifies complex tasks with just a few clicks.

EDUCATION

Marwadi University - Rajkot
